The bestselling cyberpunk author “has produced by far the most stylish report from the computer outlaw culture since Steven Levy’s *Hackers*” (Publishers Weekly). Bruce Sterling delves into the world of high-tech crime and punishment in one of the first books to explore the cyberspace breaches that threaten national security. From the crash of AT&T’s long-distance switching system to corporate cyberattacks, he investigates government and law enforcement efforts to break the back of America’s electronic underground in the 1990s. In this modern classic, “Sterling makes the hackers—who live in the ether between terminals under noms de net such as VaxCat—as vivid as Wyatt Earp and Doc Holliday. His book goes a long way towards explaining the emerging digital world and its ethos” (Publishers Weekly). This edition features a new preface by the author that analyzes the sobering increase in computer crime over the twenty-five years since *The Hacker Crackdown* was first published. “Offbeat and brilliant.” —Booklist “Thoroughly researched, this account of the government’s crackdown on the nebulous but growing computer-underground provides a thoughtful report on the laws and rights being defined on the virtual frontier of cyberspace. . . . An enjoyable, informative, and (as the first mainstream treatment of the subject) potentially important book . . . Sterling is a fine and knowledgeable guide to this strange new world.” —Kirkus Reviews “A well-balanced look at this new group of civil libertarians. Written with humor and intelligence, this book is highly recommended.” —Library Journal

This book offers a sweeping history of Pureora Forest Park, one of the most significant sites of natural and cultural history interest in New Zealand. The authors review the geological history of the volcanic zone, its flora and fauna, and the history of Maori and European utilization of forest resources. Chapter-length discussions cover management of the native forest by the New Zealand Forest Service; the forest village and its sawmills; the intensive timber harvesting, and the conflicts with conservationists and expensive compensation agreements that ensued. Separate chapters cover initiatives to protect the forest from introduced herbivores; to guard protected species, especially birds, from predators; the facilities for recreational hunting; the development of the Timber Trail, an 83 km cycleway through the forest and along old logging tramways, complete with detailed interpretation signs illustrating the history of logging; and the family recreation areas and tracks. The final chapter gathers conclusions and advances prospects for the future of Pureora Forest. In sum, the book demonstrates how ecological study, combined with a respect for people and for nature plus a flexible, interdisciplinary approach to both local history and current scientific priorities, can be welded into a consistently effective strategy for addressing the pressing forest-ecology questions of our time.

The Hacker Crackdown

It was early 1993 and id Software was at the top of the PC gaming industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel *Spear of Destiny* were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. *Game Engine Black Book: Doom* is the story of how they did it. This is a book about history and engineering. Don’t expect much prose (the author’s English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine’s revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

Earth and Tree Moving in War and Peace

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Two-time Peabody Award-winning writer and producer Ira Rosen reveals the intimate, untold stories of his decades at America's most iconic news show. It's a 60 Minutes story on 60 Minutes itself. When producer Ira Rosen walked into the 60 Minutes offices in June 1980, he knew he was about to enter television history. His career catapulted him to the heights of TV journalism, breaking some of the most important stories in TV news. But behind the scenes was a war room of clashing producers, anchors, and the most formidable 60 Minutes figure: legendary correspondent Mike Wallace. Based on decades of access and experience, Ira

Rosen takes readers behind closed doors to offer an incisive look at the show that invented TV investigative journalism. With surprising humor, charm, and an eye for colorful detail, Rosen delivers an authoritative account of the unforgettable personalities that battled for prestige, credit, and the desire to scoop everyone else in the game. As one of Mike Wallace's top producers, Rosen reveals the interview secrets that made Wallace's work legendary, and the flaring temper that made him infamous. Later, as senior producer of ABC News Primetime Live and 20/20, Rosen exposes the competitive environment among famous colleagues like Diane Sawyer and Barbara Walters, and the power plays between correspondents Chris Wallace, Anderson Cooper, and Chris Cuomo. A master class in how TV news is made, Rosen shows readers how 60 Minutes puts together a story when sources are explosive, unreliable, and even dangerous. From unearthing shocking revelations from inside the Trump White House, to an outrageous proposition from Ghislaine Maxwell, to interviewing gangsters Joe Bonanno and John Gotti Jr., Ira Rosen was behind the scenes of some of 60 Minutes' most sensational stories. Highly entertaining, dishy, and unforgettable, Ticking Clock is a never-before-told account of the most successful news show in American history.

It turns into a global nightmare: a secret mission gone awry; an American submarine commander arrested and hauled before a military tribunal in Moscow; and a game of brinksmanship so dangerous that war might be its only possible conclusion. As the U.S. Navy searches for weapons-grade plutonium that has been smuggled out of Russia by terrorists, a submarine mishap escalates the international crisis. With the world watching, JAG Officer Zack Brewer is called to Moscow to defend submarine skipper Pete Miranda and his entire crew. It is a heart-stopping race against the clock.
