The School Counselor's Book of Lists

An updated edition of an essential go-to resource for school counselors Since 1997 The School Counselor's Book of Lists has offered counselors a wealth of relevant and much-needed information written in concise and user-friendly language. A quick, easy guide for finding information on almost any topic pertinent to school counselors, the book covers everything from writing student assessments and dealing with school crises to setting budgets and running effective meetings. In order to address the transformed role of school counselors, the contents of this comprehensive second edition map to the American School Counselor Association's National Model for Counseling Programs. Includes hundreds of helpful lists offering guidelines, strategies, trends, and resources Officially endorsed by the American School Counselor Association (ASCA) The first edition was a bestselling title for school counselors Addresses the pressing issues faced by today's school counselors This revised edition is appropriate for school counseling graduate programs as well as to practitioners in the K-12 field.

Helping Skills for Working with College Students

A primary role of student affairs professionals is to help college students dealing with developmental transitions and coping with emotional difficulties. Becoming an effective helping professional requires the complex integration of intrapersonal, interpersonal, and professional awareness, and knowledge. For graduate students preparing to become student affairs practitioners, this textbook provides the skills necessary to facilitate the helping process and understand how to respond to student concerns and crises, including how to make referrals to appropriate campus or community resources. Focusing on counseling concepts and applications essential for effective student affairs practice, this book develops the conceptual frameworks, basic counseling skills, interventions, and techniques that are necessary for student affairs practitioners to be effective, compliant, and ethical in their helping and advising roles. Rich in pedagogical features, this textbook includes questions for reflection, theory to practice exercises, case studies, and examples from the field.

Handbook of School Counseling

The mission of this forty-eight chapter Handbook is to provide a comprehensive reference source that integrates counseling theory, research and practice into one volume. It is designed to meet the needs of entry-level practitioners from their initial placement in schools through their first three to five years of practice. It will also be of interest to experienced school counselors, counselor educators, school researchers, and counseling representatives within state and local governments.

Clinical Supervision Activities for Increasing Competence and Self-Awareness

Cultivate self-awareness, empathy, and clinical competence in the mental health professionals you supervise. Providing tested guidance for clinical supervisors of mental health professionals, editors Roy A. Bean, Sean D. Davis, and Maureen P. Davey draw from their own backgrounds in training, private practice, and academe, as well as from an international panel of experts representing various mental health fields to provide activities and best practices that allow therapists to better serve an increasingly diverse set of clients and issues. While clinical skills are easily observed, the more subtle areas of self-awareness, or exploring unexamined judgments are more difficult to spot and to provide supervision and guidance for. The numerous experiential activities included will help supervisors and the mental health professional they supervise develop their skills and techniques around: Intuition Empathy Self-awareness Mindfulness Multicultural awareness Perspective taking. The book covers both clinical as well as diversity-focused competence and awareness, and suggests various forms of activities, including research exercises, reflection, journaling, and more. Each activity includes measurement metrics as well as additional resources that help clinicians identify the best activity for a given situation. Appropriate for clinicians at every level and from a multitude of backgrounds, these tried and tested best practices can be used in clinical supervision, as a class assignment, or to facilitate professional growth.

Diagnostic Interviewing

This volume represents a clear, jargon-free overview of diagnostic categories with helpful hints regarding a psychiatric interview. Completely revised and updated, detailing current innovations in theory and practice, including recent changes in the DSM-IV.

The Athletic Trainer's Guide to Psychosocial Intervention and Referral

"The Athletic Trainer's Guide to Psychosocial Intervention and Referral provides appropriate intervention strategies and referral techniques specific to the role of an athletic trainer to initiate recovery for any patient/client experiencing a variety of psychosocial problems such as: eating disorders, anxiety issues, substance abuse, response to injury, catastrophic injuries, ergogenic aids, peer pressure, and depression."-- Jacket.

Ethics and Values in Social Work

In a unique and student-friendly package, *Ethics and Values in Social Work* offers a series of learning modules that will ensure graduates receive a comprehensive ethics and values education. Designed to be easily incorporated into any curriculum, each module helps students integrate the knowledge, skills, self-awareness, and critical thinking abilities required for dealing with ethical issues. From applying basic ethical standards of practice to managing complex ethical dilemmas, this textbook equips readers with a range of tools and strategies for responding to ethical questions and concerns. Traditional ethics textbooks provide students with a model for ethical decision making. This breakthrough textbook goes beyond ethical decision making by providing students with a strategic framework for managing ethical issues that includes guidelines for engaging others in ethical discussions and using conflict resolution theory to promote collaborative solutions. Some textbooks introduce students to ethical theories, such as deontology, teleology, and virtue ethics. This textbook goes beyond describing these theories by providing students with opportunities to apply, compare, and contrast these approaches as they relate to various contexts of social work practice. A wealth of case scenarios, discussion questions, and role-play exercises make this an engaging, thought-provoking teaching and learning tool. At a basic level, this textbook teaches students the essential principles and standards that define ethical practice. At a more profound level, *Ethics and Values in Social Work* inspires students to reach for the highest values of profession: service, dignity and worth of the person, human relationships, integrity, competence, social justice, human rights, and scientific inquiry.

Substance Abuse

Resource added for the Human Services 105203 and AODA 105501 programs.

Neuropsychopharmacology

Neuropsychopharmacology reviews the principles of pharmacology with a focus on the central nervous system and autonomic nervous system. Beyond autonomic and central nervous system pharmacology, this volume uniquely discusses psychiatric disorders and the pharmacological interventions that are available for conditions including depression, schizophrenia and anxiety disorders. With a focus on these specific body systems, readers will see end-of-chapter questions that offer real-world case studies, as well as multiple-choice questions for further learning. Beneficial features and content also include two extensive examination tests, which each contain 100 questions for better learning or to be used in teaching, and a glossary. Helpful appendices cover high-alert medications and toxicology effects on the nervous system. Each chapter will contain classifications of medications, pharmacokinetics, mechanism of action, clinical indications and toxicities. Describes pharmacology principles pertaining to the central and autonomic nervous system Identifies pharmacological interventions for psychiatric disorders including current evidence-based interventions for depression, schizophrenia and anxiety disorders Features chapter outlines, end-of-chapter questions, real-world case studies and examinations for deeper learning or teaching

Addictions Counseling Today

Winner of the 2020 Canadian Counselling and Psychotherapy Association (CCPA) Counselling Book Award Enlightening and practical, Addictions Counseling Today invites students into the heart of addictive thinking, offering first-person accounts of what it is like to experience different addictions. The text covers the range of addictions from alcohol, drug abuse, and nicotine to various process addictions, including sex, internet, gaming, social media, and gambling. Also included are the various theories and models of addiction, with a unique chapter on the neuroscience of addiction. Focusing on the new DSM-V classifications for addiction with an emphasis on CACREP and treatment, this provocative, contemporary text is an essential reference for both students and practitioners wanting to gain a deeper understanding of those with addiction. Online Resources Free PowerPoint® slides with video for instructors are available with this text.

Treatment Strategies for Substance Abuse and Process Addictions

This distinctive and timely text examines the most prevalent substance and process addictions and focuses on current research and evidence-based treatment strategies. Major substance addictions discussed include alcohol, tobacco, marijuana, methamphetamines, and prescription drugs. Complete chapters are also devoted to the most frequently cited process addictions, making this text unique. Behavioral addictions covered in this text include pathological gambling, sex disorders, disordered eating, work, exercise, shopping, and Internet/gaming. Each chapter contains a listing of student learning outcomes, a case study with reflective questions, techniques for assessment and diagnosis, inpatient and outpatient treatment approaches, and resources for further study. With its emphasis on treatment strategies, this text can be used by practitioners as well as by professors in the classroom in introductory courses in addictions or in subsequent courses that focus on treatment strategies. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

Theory and Practice of Addiction Counseling

Theory and Practice of Addiction Counseling by Pamela S. Lassiter and John R. Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include motivational interviewing, moral theory, developmental

theory, cognitive behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention.

A Concise Guide to Opioid Addiction for Counselors

This brief, evidence-based guide is ideal for busy mental health professionals helping clients with opioid use disorders (OUDs). It examines the devastating global impact caused by opioids and is replete with information and resources that can be immediately applied to addiction work. The authors' pragmatic, strengths-based approach to treatment is based on a collaborative counselor-client working alliance to achieve client readiness for change, moderation, and abstinence. Topics discussed include current research on risk and protective factors, OUD assessment and diagnosis, the ethical and legal issues particular to addiction work, medication-assisted treatment, physical and psychological interventions for pain management, and the necessity of interdisciplinary care. In addition, Drs. Alderson and Gladding provide a number of counseling approaches and treatment options that consider work with women, youth, people of color, LGBTQ+ individuals, veterans, older adults, people with disabilities, individuals in the criminal justice system, and rural residents. Five useful appendices conclude the book, including a listing of 20 opioid drugs in descending order of potency; common ICD-10, ICD-10-CM, and ICD-11 codes; and a glossary of terms and abbreviations. About the Authors Kevin G. Alderson, PhD, is professor emeritus of counseling psychology from the University of Calgary. He is an editorial board member of the *Journal of Alcoholism, Drug Abuse & Substance Dependence* and the *Austin Journal of Drug Abuse and Addiction*, as well as the editor of the *Canadian Journal of Counselling and Psychotherapy*. Samuel T. Gladding, PhD, is a professor in the Department of Counseling at Wake Forest University and the author of numerous, best selling counseling texts. *Requests for digital versions from ACA can be found on www.wiley.com. *To purchase print copies, please visit the ACA website here *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org

Psychopathology and Psychotherapy

Psychopathology & Psychotherapy: DSM-5 Diagnosis, Case Conceptualization, and Treatment, Third Edition differs from other psychopathology and abnormal psychology books. While other books focus on describing diagnostic conditions, this book focus on the critical link between psychopathology and psychotherapy. More specifically, it links diagnostic evaluation, case conceptualization, and treatment selection to psychotherapy practice. Research affirms that knowledge and awareness of these links is essential in planning and providing highly effective psychotherapy. This third edition incorporates detailed case conceptualizations and treatment considerations for the DSM-5 diagnoses most commonly seen in everyday clinical practice. Extensive case studies illustrate the diagnostic, case conceptualization, and treatment process in a way that makes it come alive. Written by practicing clinicians with expertise in specific disorders, this book will be an invaluable resource to both novice and experienced clinicians.

Introduction to Social Work

This classic introductory social work text provides a comprehensive and historical view of social work to help students better understand the profession. In its Ninth Edition, this classic text continues to blend historical and contemporary perspectives on social work, offering historical context for the development of social work while utilizing the latest theoretical constructs. Special consideration is given to AIDS, welfare reform, school violence, alcohol and drug dependence, case management, mental illness, and other challenging social problems. The text is appropriate for undergraduate students who want to increase their general understanding of social work, as well as those who have a professional interest in social work.

Behavioral Addiction

Written in scientific prose that can also be understood by the layperson, this comprehensive volume is a must-read for those working in the addiction field and anyone interested in learning more about this devastating disease. An-Pyng Sun, PhD, is a professor at the University of Nevada, Las Vegas School of Social Work. Larry Ashley, EdS, LCADC, is the addictions specialist and undergraduate coordinator at the University of Nevada, Las Vegas. Lesley Dickson, MD, is ABPN board-certified in general psychiatry, addiction psychiatry, and psychosomatic illness.

Substance Abuse Counseling: Theory and Practice

Perfect as the major resource in first courses in Substance Abuse Counseling and Drugs and Behavior or for general clinicians as an on-the-job resource. Could also be useful as an adjunct to, not a replacement for, a number of core counseling courses: counseling theory, techniques of counseling, counseling strategies, and school counseling This guide is designed to increase the knowledge base of the reader/student about alcohol, tobacco, and other drugs (ATOD) and to help them more clearly understand the process of working with clients who are misusing or abusing these drugs—now updated to include the changing substance abuse problems in our nation and around the world. Recognised for its clarity, accessibility, and practical approach, this widely used text thoroughly examines substance abuse in the population, addressing ways to measure the problem and ways to treat individuals and families who seek assistance. The authors educate prospective and practicing clinicians and counselors by guiding them, step-by-step, through the process of working with substance-abuse clients. While the chapters generally build on each other as they take readers through the theory and practice of substance abuse counseling, each chapter can be used as a stand-alone source of valuable information. Illustrative case studies with critical thinking questions give readers opportunities to examine and discuss a wide variety of cases. Individual chapters on special populations add substantial depth to the text's treatment of its subject. Introduction to Therapeutic Counseling

This text provides students with an overview of the counseling profession, including information on what counseling is, the history of counseling, theoretical orientations, counseling applications and professional issues. The text's unique student-oriented focus engages students in exploring their motives for wanting to be a counselor. To help students learn about the realities of the field, Kottler includes "Voices from the Field" sections, which contain interviews with practicing counselors discussing the challenges they've faced and the ways they resolved those challenges. Experiential and reflective exercises, integrated into every chapter, help the student reflect on the material.

Social Psychology [2 volumes]

This book provides an introduction to social psychology that covers its history, theories, and core concepts. It explains intrapersonal (how others influence our views about ourselves) and interpersonal (how we think about and act toward other people) applications of this discipline in today's society. Human beings are social by nature. Because of this, the people around us have a profound impact on how we think about ourselves and others—from our sense of self esteem to our opinions and attitudes to our interactions in a group setting. *Social Psychology: How Other People Influence Our Thoughts and Actions* describes these subtle but powerful effects in our daily lives, offering a complete and balanced view of the topic. Readers will discover the history of social psychology, grasp its theories and core concepts, learn about important issues and debates related to this topic, and see how these ideas are directly applicable to therapy and other real-world situations. Chapters cover how an individual's self-concept is developed and the various social forces on it, how a social psychology experiment may be conducted, and examples of social psychology in everyday life, such as group dynamics and cultural phenomena. Readers will also see how social psychology plays a role in our criminal justice system, including in the context of the prison system population; in the cultural issues associated with Latino and Native American populations; in our social collective concern about mass shootings, epidemics, and terrorism; and in the dynamics, processes, and tactics of a nationwide presidential election campaign seeking to influence the masses.

Forthcoming Books

In this second edition of a practical and eminently useful resource, Rosemary Thompson discusses the new and expanded roles of today's school counselors. In the wake of recent school violence, and in light of the tough decisions that students now face everyday, the role of the school counselor has changed dramatically. Today, more than ever, school counselors must do more than simply offer guidance on educational and vocational choices, but must become catalysts for change. This second edition examines the ways in which recent economic, political, social, and educational trends have impacted the professional school counselor. Throughout the text, Thompson integrates her discussion of recent national reform issues and the new professional standards set forth by the American School Counselors Association. Focusing throughout on the inherent benefits of and need for professional counseling in our schools, this second edition is a groundbreaking resource and will be of great value to school counseling students and professionals alike.

The School Counseling and School Social Work Treatment Planner

This text provides readers with practical skills and treatment strategies and is unique in its conceptualization of substance abuse treatment from a rehabilitation perspective, and its perspective of substance abuse as a disability. The authors treat substance abuse as a complex problem, with a diverse etiological basis stressing that recovery is a process that is holistic, individualized, and functionally based.

School Counseling

With time at a premium, today's clinicians must rapidly engage their patients while gathering an imposingly large amount of critical information. These clinicians appropriately worry that the "person" beneath the diagnoses will be lost in the shuffle of time constraints, data gathering, and the creation of the electronic health record. *Psychiatric Interviewing: The Art of Understanding: A Practical Guide for Psychiatrists, Psychologists, Counselors, Social Workers, Nurses, and other Mental Health Professionals, 3rd Edition* tackles these problems head-on, providing flexible and practical solutions for gathering critical information while always attending to the concerns and unique needs of the patient. Within the text, Dr. Shea deftly integrates interviewing techniques from a variety of professional disciplines from psychiatry to clinical psychology, social work, and counseling providing a broad scope of theoretical foundation. Written in the same refreshing, informal writing style that made the first two editions best sellers, the text provides a compelling introduction to all of the core interviewing skills from conveying empathy, effectively utilizing open-ended questions, and forging a powerful therapeutic alliance to sensitively structuring the interview while understanding nonverbal communication at a sophisticated level. Updated to the DSM-5, the text also illustrates how to arrive at a differential diagnosis in a humanistic, caring fashion with the patient treated as a person, not just another case. Whether the reader is a psychiatric resident or a graduate student in clinical psychology, social work, counseling or psychiatric nursing, the updated third edition is designed to prepare the trainee to function effectively in the hectic worlds of community mental health centers, inpatient units, emergency rooms, and university counseling centers. To do so, the pages are filled with sample questions and examples of interviewing dialogue that bring to life methods for sensitively exploring difficult topics such as domestic violence, drug abuse, incest, antisocial behavior, and taking a sexual history as well as performing complex processes such as the mental status. The expanded chapter on suicide assessment includes an introduction to the internationally acclaimed interviewing strategy for uncovering suicidal ideation, the Chronological Assessment of Suicide Events (CASE Approach). Dr. Shea, the creator of the CASE Approach, then illustrates its techniques in a compelling video demonstrating its effective use in an interview involving a complex presentation of suicidal planning and intent. A key aspect of this text is its unique appeal to both novice and experienced clinicians. It is designed to grow with the reader as they progress through their graduate training, while providing a reference that the reader will pull off the shelf many times in their

subsequent career as a mental health professional. Perhaps the most unique aspect in this regard is the addition of five complete chapters on Advanced and Specialized Interviewing (which comprise Part IV of the book) which appear as bonus chapters in the accompanying e-book without any additional cost to the reader. With over 310 pages, this web-based bonus section provides the reader with essentially two books for the price of one, acquiring not only the expanded core textbook but a set of independent monographs on specialized skill sets that the reader and/or faculty can add to their curriculum as they deem fit.

The Rehabilitation Model of Substance Abuse Counseling

School-aged children (grades K-12) are often faced with personal problems that can hinder their ability to succeed in the school environment. This Treatment Planner focuses on school-related problems such as study and organizational skill deficits and academic motivation/underachievement, as well as \"outside\" issues such as blended families, divorce, substance abuse, teen pregnancy, and parenting skill deficits. This new edition features empirically supported, evidence-based treatment interventions including coverage of disruptive classroom behaviors, reinforcing student success, bullying, peer conflict, and school violence and includes DSM-5 and ICD-10 diagnostic codes.

Psychiatric Interviewing E-Book

This text highlights the indispensable role of school counselors today, namely as change agents in an increasingly complex and fluctuating school system. Informed by emerging standards of practice and current research, the book adopts the salutary perspective of solution-focused brief therapy as its foundation. It outlines practical and time-sensitive strategies for school counselors to use with students, parents, teachers, and administrators. The Solution-Focused School Counselor encourages readers to envision and proactively construct interactions with students, families, and staff that contribute not only to the formation of an exceptional school, but to the shaping of an effective professional practice. Blending current theory into practice, the authors have consulted research across a variety of disciplines and have related it in an understandable format. School counselors will find this book useful either as a professional resource to be read from cover-to-cover, or as a reference tool from which specific sections may be consulted. This book is an excellent resource for school counselors and students alike. It is also useful for school psychologists and administrators as well as anyone interested in making a difference in the school setting.
