You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell. Along the way you'll learn the timeless skills handed down by generations of gray-bearded, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to:

- * Create and delete files, directories, and symlinks
- * Administer your system, including networking, package installation, and process management
- * Use standard input and output, redirection, and pipelines
- * Edit files with Vi, the world's most popular text editor
- * Write shell scripts to automate common or boring tasks
- * Slice and dice text files with cut, paste, grep, patch, and sed

Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust. A featured resource in the Linux Foundation's "Evolution of a SysAdmin"

The third 'International Survey of Text and Image Copyright Levies', jointly published by the World Intellectual Property Organization (WIPO) and the International Federation of Reprographic Rights Organizations (IFRRO) builds on and updates the first two surveys published in 2014 and 2015, and analyzes the origins, scope and current use of these levies around the world, and their role in ensuring easy legal access to copyright material. The Survey also shows how and why text and image (TI) levies are different from audio and audio-visual private copying levies. As with the first two surveys, it uses data from IFRRO members, collated and presented by Paul Greenwood, a consultant, with the assistance of representatives of IFRRO members and the IFRRO Secretariat. The methodology and scope are unchanged.
